COMING SOON: GPS Tracking and Asset Management Systems for landscaping and lawn care equipment

All your equipment in one place

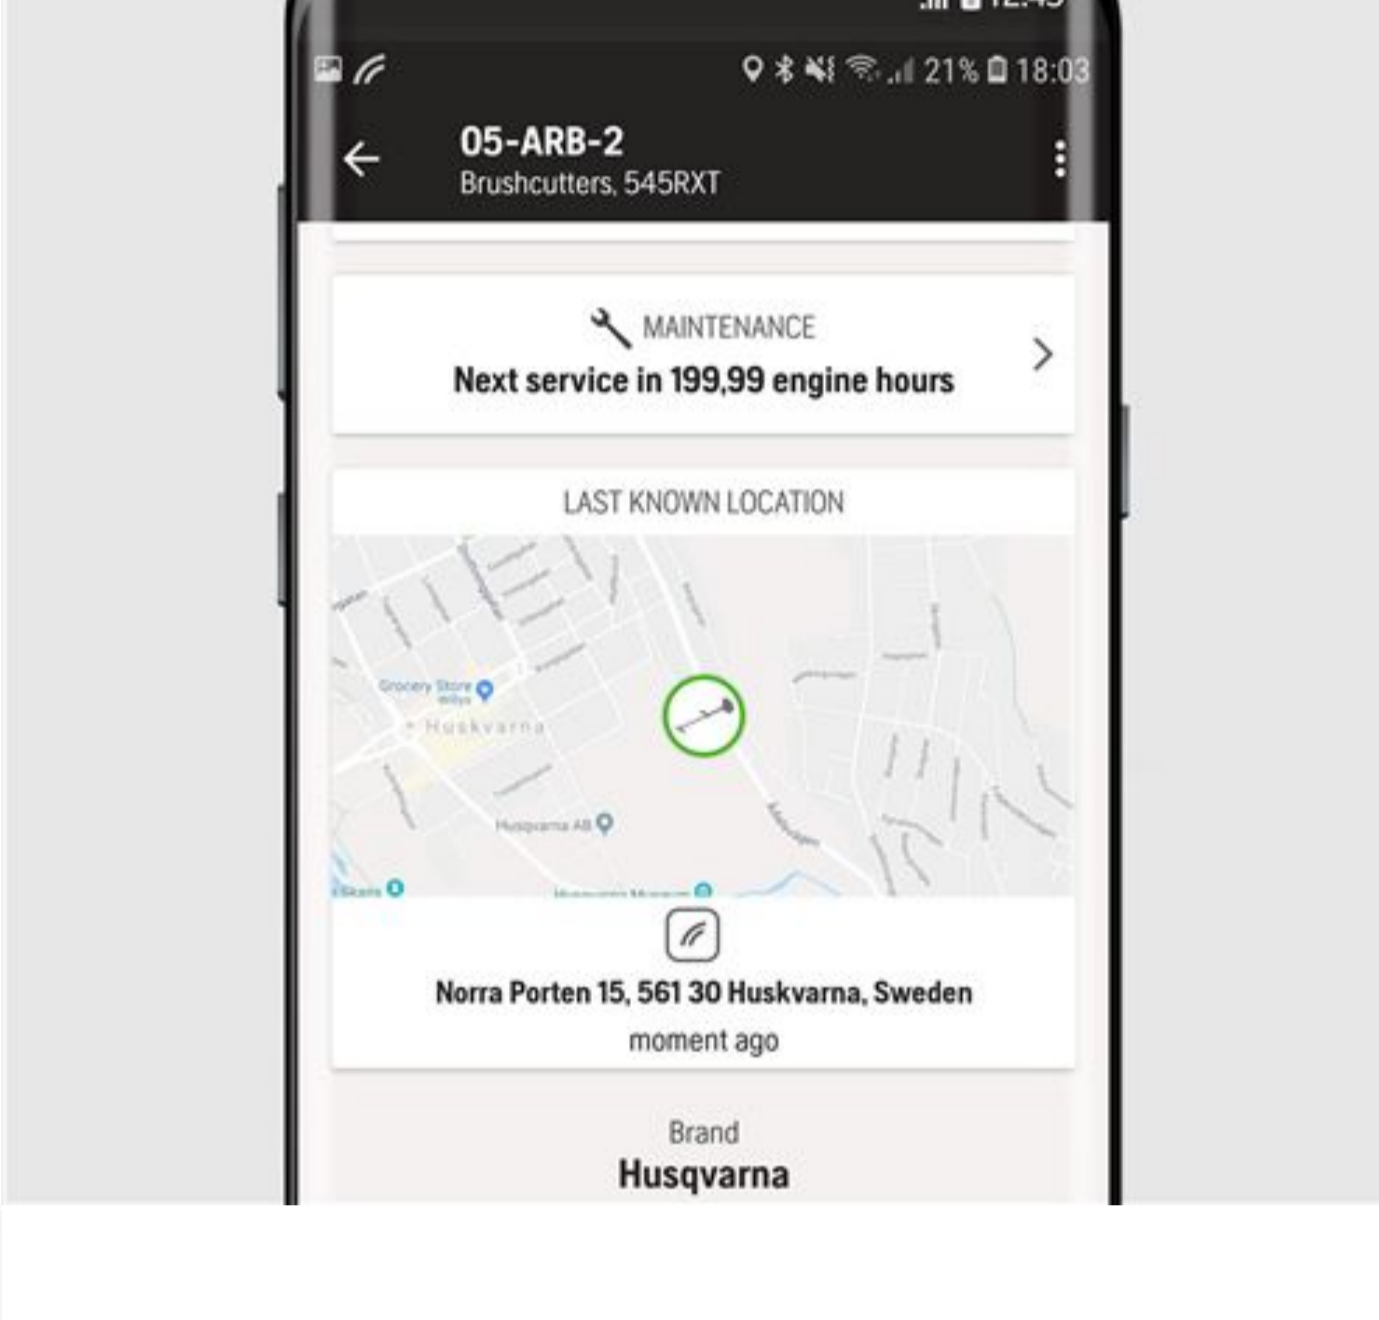

Say goodbye to paperwork! Husqvarna Fleet Services™ allows you to check your inventory list and know exactly how many machines you have in service. Give them unique names and you'll be able to tell easily which is which. The inventory list can be made available to all users in your company. You can add sensors to all types of landscaping equipment, as well as utility vehicles, trucks, and products from other manufacturers.

[Husqvarna Fleet Services™ Counting Counts >](#)

Find them all on the map

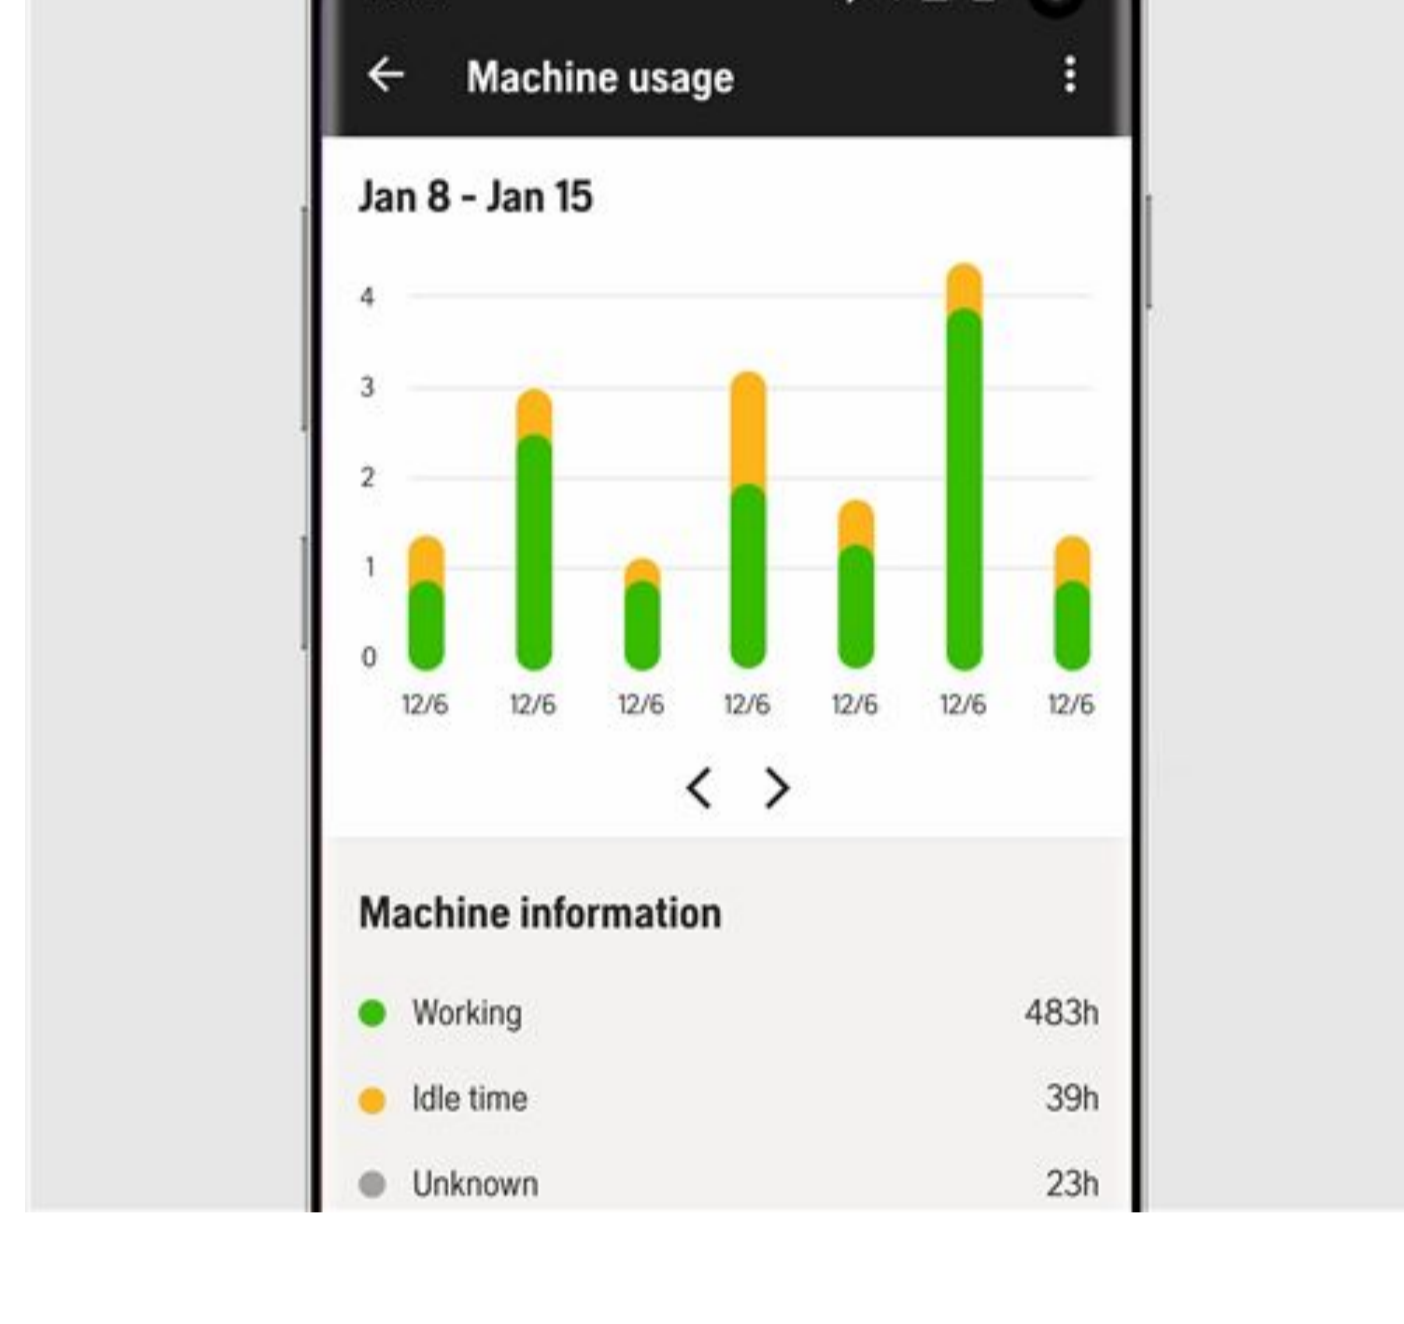

Always know where you last had your equipment with Husqvarna Fleet Services™. Every time a machine with a sensor is close to a smartphone or tablet running the app, its location is registered. So whenever you're looking for a piece of equipment, simply check the map to find out if it's in storage, away for service or out working. Plus, our robotic mowers have built-in GPS and connectivity, allowing their location to be tracked constantly.

See when and how much you've used it

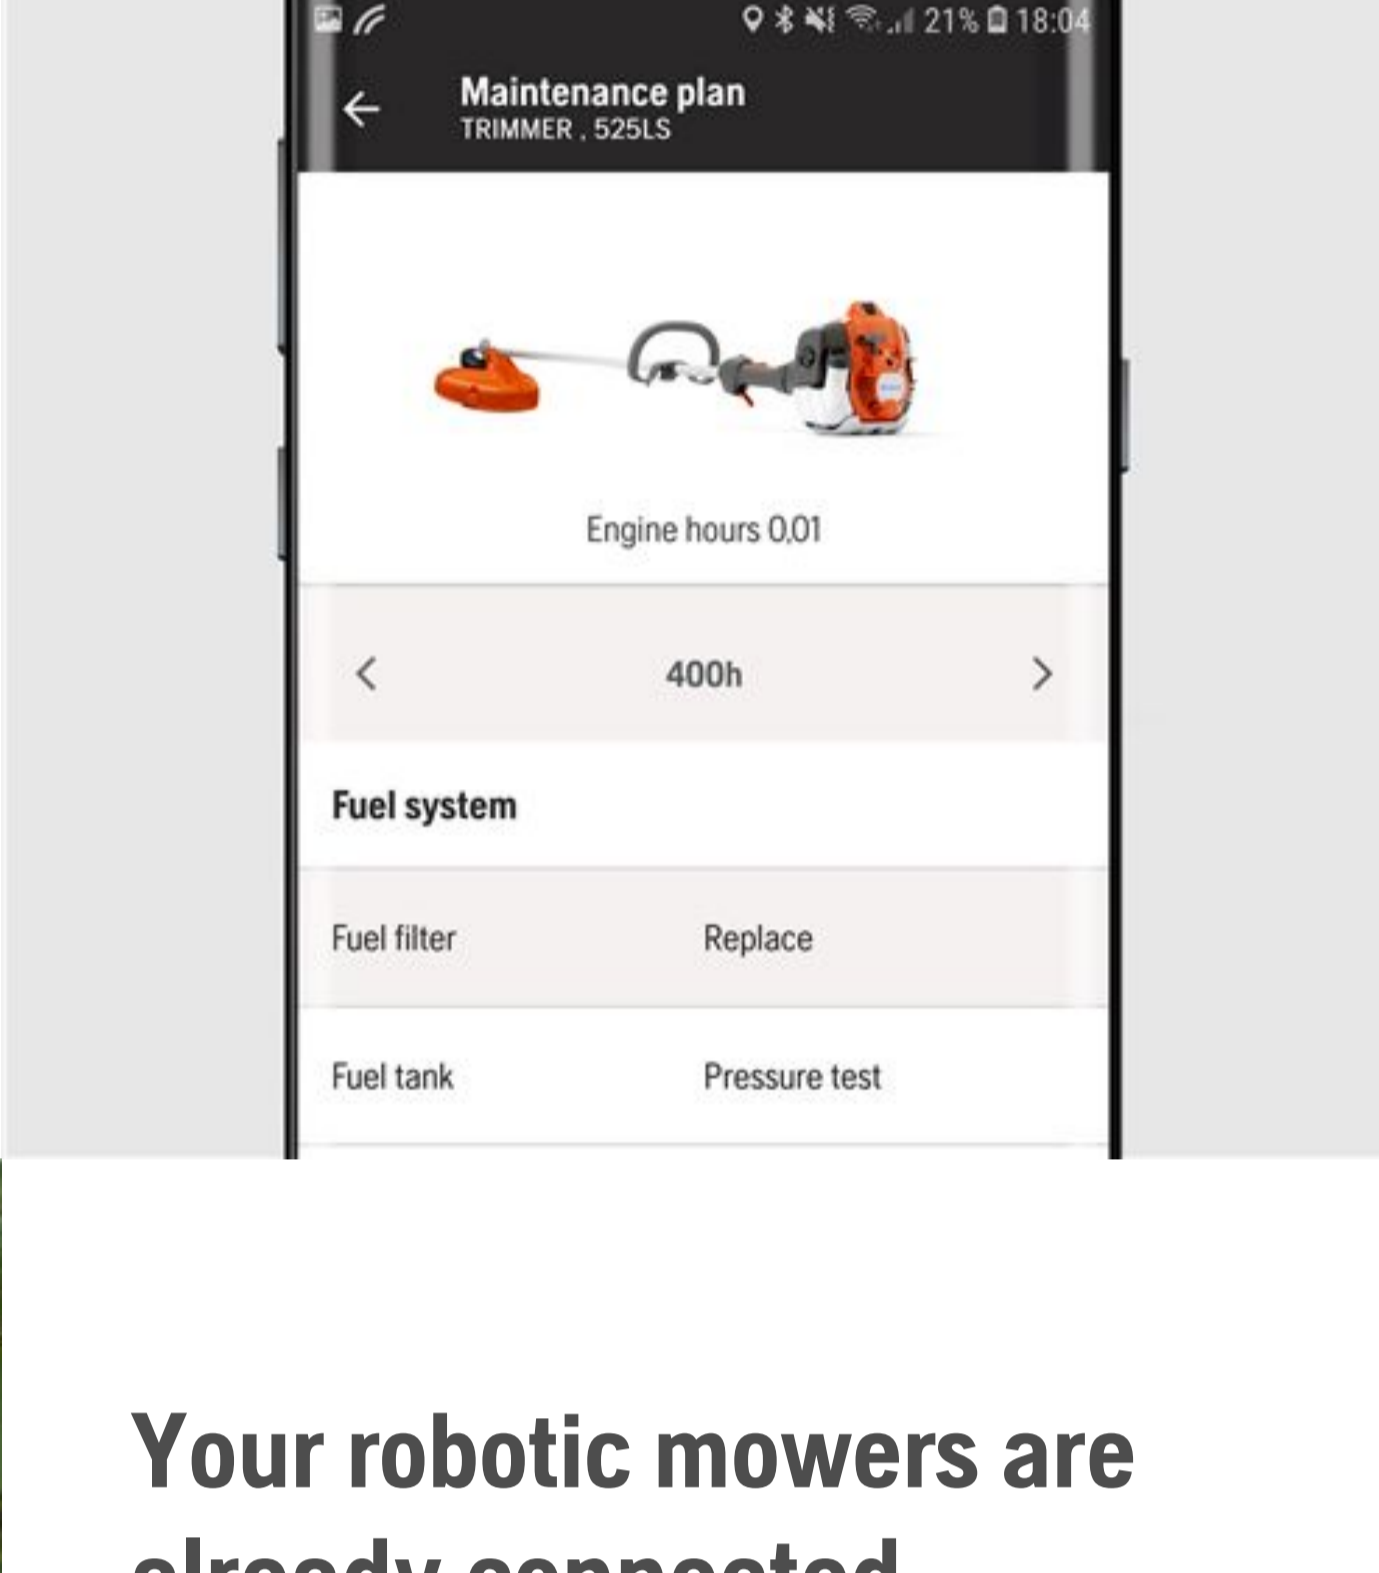

Want to know how often you've used a particular piece of equipment? Need to calculate how much time your team spends mowing, trimming, blowing or handling any other task? Simply check the machine usage report in Husqvarna Fleet Services™ and you'll have the data you need to manage your tools effectively and maximize your team's efficiency.

Service history and notifications

The sensors track the exact total engine hours of every piece of equipment. By looking into the Husqvarna Fleet Services™ system, you can always tell the actual age and service history of each machine, as well as the overall investment and repair costs. This makes it easier to know when it's time to replace a unit. Plus, you'll receive notifications when a machine comes due for service, helping you keep up-to-date with maintenance and reducing the risk of unplanned downtime.

Get a handy tool for reducing CO2 emissions

Reducing CO2 emissions is an important target in all types of businesses. The carbon footprint calculator provides you with the data you need to take action and to

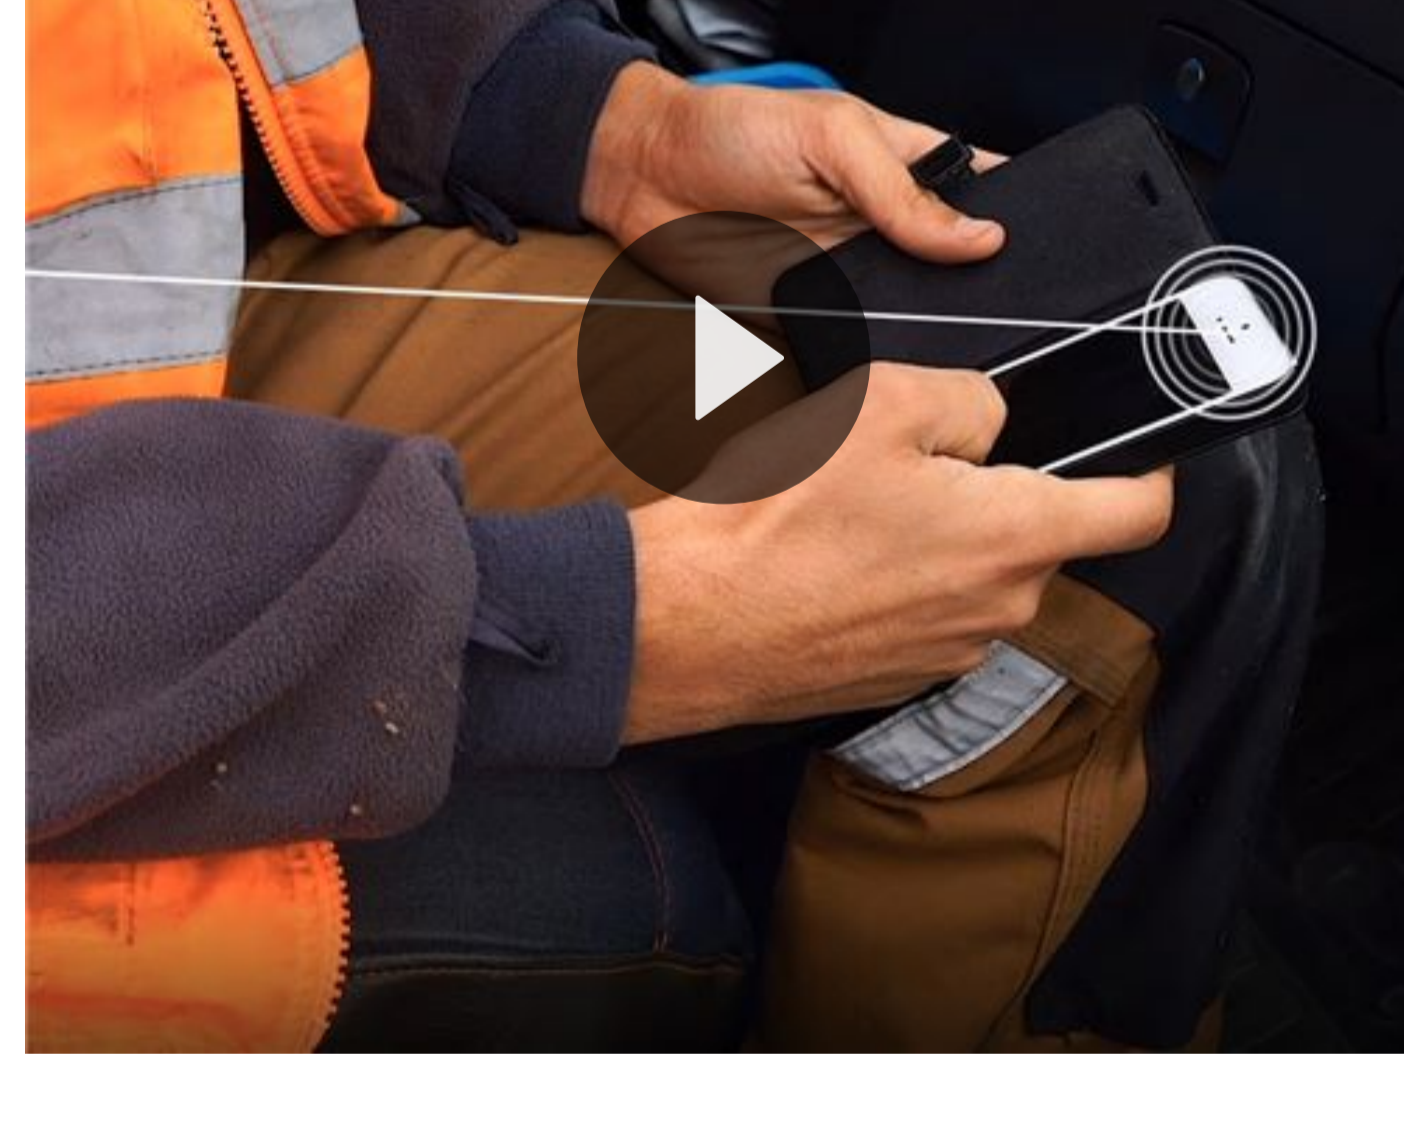

Spend less time managing your equipment

Husqvarna Fleet Services™ keeps an eye on the equipment for you. Weekly reports and messages will alert you if there's anything you need to deal with. This saves time. And

How it works

The system keeps track of your equipment either through the use of machine sensors or – in the case of our professional robotic mowers – built-in connectivity. The equipment data is transmitted via Bluetooth (for Automower® it's via 2G/3G) and can either be collected in the field via the intuitive Husqvarna Fleet Services™ app, or back in storage via the Husqvarna Fleet Services™ Gateway app. The combination of these apps gives you updated data that's automatically uploaded to the cloud-based account where you can access it from any device.

See the apps in action

Watch this video to see how easy it is to use Husqvarna Fleet Services™ to keep track of the use of your equipment by using the Husqvarna Fleet Services™ App and the Husqvarna Fleet Services™ Gateway app.

APPS COMING SOON!

FAQs

How do I get started?	
What are the different apps used for?	
How does tracking work?	
What does installation involve?	
Can you tell me more about the sensors?	Can the sensor withstand tough professional work? <p>Yes, the sensor holder and sensor electronics are constructed for many years of usage in different customer work applications such as landscaping, tree-care, construction etc.</p>
What equipment is compatible?	Do the sensors provide live GPS tracking? <p>No. The location captured by the system is always 'last known', as seen by any of the fleet apps. The GPS position of the machine comes from the Smartphone and not from the sensor itself.</p>
Can I assign different users?	Can I install sensors on equipment from other brands? <p>Yes, you can install sensors on machines from any 3rd party brand to connect them to Husqvarna Fleet Services™.</p>
Other FAQs	What are the technical specs on the sensors? <p>Weight: 1 oz. (including battery) Size: 2.7" x 1.7" x 0.6" Battery: GP2450 or equivalent Battery life, engine on hours: Approx. 350hrs Battery life, on the shelf: Approx. 10 months Radio: Bluetooth Low Energy Memory capacity: 60 days data (when assuming 8hrs working day) Max temperature: 140°F (60°C) Min. temperature: -4°F (-20°C)</p>
